

M800

OUR STATEMENT

Power without noise, comfort without compromise, joy without limits. The high-end electric boat M 800 from the Marian shipyard is the result of experience and requirements for the future. Completely redesigned, equipped with the latest technology and provided with details that prove the love for boat building, this flagship sets standards for the future - in every direction, in harmony with nature.

Powerful, quiet electric boats of the highest quality and perfect design, like the M 800, will show the progressive spirit of their creators for years to come. With the M 800 you can already enjoy tomorrow's standards today.

Many colors are possible, we are happy to advise.

The perfect builder is nature. Whoever understands nature and integrates it into the conception will achieve the best results. The M 800 is so elegant because it is in complete harmony with the element of water. The lowest possible resistance and the greatest possible maneuverability make the boat fast, smooth and easy to steer.

Even the retractable sun canopy continues the streamlined shape and makes the 7.90 meter long boat a harmonious power pack with an output of up to 150 kW. Water skiing becomes an extra pleasure at speeds of up to 65 km / h.

DESIGN

Foredeck in Teak

Hydraulically retractable sun roof

Large sunbathing area

Retractable bathing ladder

Perfect streamline shape

Powerful drives, up to 150 kW

PERFORMANCE

The nomination for the international "Best of Boats" Award 2019 shows how perfect the M 800 is in every detail. Only the finest materials such as leather, precious woods and chrome are used and processed by hand. A large on-board computer shows all the data, from water temperature and depth to the state of charge of the batteries.

The M 800 also has an optional autopilot. A reversing camera provides additional security, as does the underwater lighting. Each M 800 is also unique, because many elements, such as color, equipment or materials, can be selected according to taste.

M800

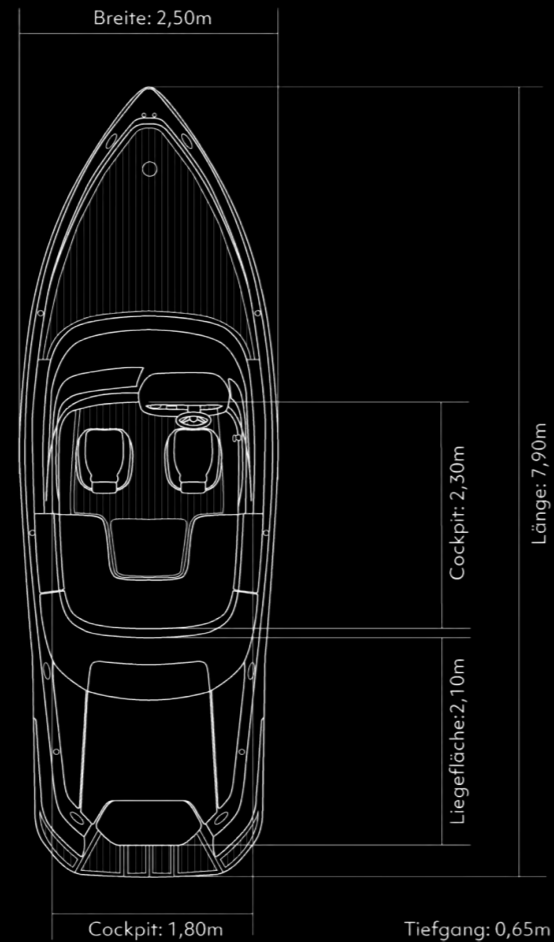

The sum of all senses

TECHNICAL SPECIFICATIONS

Length	7,90 m
Width	2,50 m
Weight from	1300 kg
Draft	0,65 m
Number of people	7
CE certification	C

ENGINE OPTIONS

60 kW	E- Motor
100 kW	E- Motor
125 kW	E- Motor
150 kW	E- Motor

HIGHLIGHTS

- Board computer, clock
- GPS speed display bathing
- platform with bathing ladder 12
- 15.1 inch multifunctional display
- water temperature depth gauge
- LED ambient lighting

- Custom colors of hull and deck
- Teak on foredeck and teak floor
- cooler drawer
- Bow thruster
- Bang & Olufsen® sound system
- Electric windlass with anchor
- reversing camera
- Rudder indicator
- Autopilot
- LED bow lights
- LED underwater lighting
