

**LAGUNA 760**

# OUR TOP MODEL

The power can be felt but not heard. The benchmark for luxury on the inland lakes is the Marian Laguna 760 electric. More wishes than expected are fulfilled here and create a feeling of grandeur. Environmentally friendly, beautifully shaped, the finest workmanship and state-of-the-art technology also make a classic look forward-looking.

Anyone who has steered the new flagship of the Marian shipyard does not immediately know what makes the special driving experience, but you can feel that a total work of art has been created here, made up of many details that all contribute to pampering the driver and his companions and to inspire.

# ELEGANCE

with distinction

The best advertisement for a product is done by others. The Laguna 760 Elektro is a finalist in the international "Best of Boats" Award 2017. The reason is because of the drive system that even exceeds the new international standard. The Laguna 760 won the "German Design Award" 2019 for its exciting design. Only fine woods and fine leather are used. Highlights are set in chrome.

Elegance paired with functionality in all areas and enough space to relax and enjoy. Anyone who has experienced this attitude to life once does not want to be without it again.

# FREEDOM

without limits

Water relaxes. The most thrilling way to enjoy the water is from your own boat. Glide between heaven and earth as a captain or guest. The Marian Laguna 760 was created to offer the highest level of joy, exhilaration, relaxation and freedom. Many highlights contribute to this, starting with the retractable sun roof and ending with the colors of your choice for the hull and deck.

And then experience this power and speed from the up to 125 kW electric motor. All summer long, without time restrictions, like with motor boats.
